

SpillEater

The Natural Spill Absorbent

OIL
ABSORBENT

SpillEater Oil Absorbent

SpillEater Oil Absorbent is an all natural renewable cotton⁽¹⁾ plant bi-product which is engineered to perform fastest in picking up only oil based spills like diesel fuel or motor oil, without absorbing water (Hydrophobic), suppressing oil odors, and reacting with absorbent's natural enzymes to biodegrade oil hydrocarbons. This absorbent is designed for picking up motor oil and fuels and picking up oil from wet areas by absorbing oil and not the water.

Rated

#1

Spill Cleanup

- ✓ Absorbs up to 68% faster with up to 48% less absorbent material
- ✓ Absorbs 6X its weight

20 years of absorbent technologies

Ted Dickerson, President, chemist, and patent holder from Multigraphic Industries has been serving the oil drilling industry for over 20 years with engineered absorbent products. These products are US manufactured in Mississippi and Texas for distribution worldwide. SpillEater absorbent products are engineered based on the same technologies but for retail and commercial customers. This brings a 20-year tested and reliable absorbent to small spill applications. As Ted says, "It's the very best you can do for the environment and the people who handle spills."

SpillEater absorbent is available in a complete line of packaging options. Spill pickup supplies and kits are also available – see www.spilleater.com.
