

The ultimate spill clean-up tools

The 900 multipurpose floor brush/squeegee works great on wet & dry spills. The centerline bristle design sweeps fine dry materials especially well; and, it has a squeegee edge for liquids. It's chemical resistant so it can be used with a variety of cleaning solutions and absorbent materials.

- **Separated Bristles**
- **Unique Centerline Technology**
- **Specially Formulated Material**
- **Standard acme threads**

On most lobby pans the T-Bar only rotates to 90 degrees (perpendicular to the ground). The patented 135 degree rotation of the Smart Broom Series spill lobby dustpan allows for the T-Bar to be pulled completely out of the way when using squeegee to pull wet spills into the pan – perfect for spill cleanup.

- **Patented 135° Rotating T-Bar Technology**
- **Spill Clean-Up Instructional Label**
- **Squeegee Blade Edge to Aid in Picking up Wet Material**

The 900 Series tools are uniquely effective on wet, dry and combo spills. The broom has bristles to sweep dry material and the squeegee to clean up any wet spills. The lobby pan with handle clip is also designed for wet, dry and combo spills. Its squeegee edge allows for more effective picking up of fine dry material and for using a squeegee to pull in wet material.
